### Gas Tank Cage Features:

- Weather-resistant for outdoor use
- Meets OSHA 1910.110, NFPA 58 for LPG storage, and CSA-B149.2 standards
- 100% welded aluminum construction will not rust, corrode or discolor
- Heaviest gauge aluminum cabinet available ensures durability
- Mesh sides eliminate risk of flammable gases building up
- Wire mesh sides allow easy cylinder visibility
- Cabinet is 67% lighter than steel for easier positioning and lower shipping costs
- Roof is sloped to let rain and ice fall
- 2 warning and 2 identification labels
- Includes chain to secure cylinders inside of cabinet
- Padlock lug for security
- Pre-drilled holes at each corner for 5" (12.7mm) anchor bolts
- Solid top roof reinforces stability
- Ships fully assembled

- Product Weight: 93 lbs

### Product Description:

This 100% welded aluminum gas cylinder cabinet is designed to help you secure and protect your propane and compressed gas cylinders. The cabinet is durable, easily used, and will not rust, corrode or discolor. Expanded .065" (1.65mm) thick metal panels offer unmatched strength and extra resistance to tampering. It's heavy gauge aluminum mesh and extruded frame add rigidity. Slanted roof design allows water and ice to fall off roof. Top is solid for reinforcement. Cabinet includes warning labels and empty/full cylinder labels. Extruded .125" (3mm) thick, heavy aluminum framework provides superior strength. Easy-to-use rack positions cylinder securely and stores 20 and 33 lb (9 and 15Kg) cylinders. Heavy, expanded .065" (1.65mm) thick aluminum mesh panels and all-welded construction resist abusive outdoor elements - won't rust or discolor. Padlock lug for security. Also includes a chain to secure the cylinders inside of the cage. Aluminum's long lasting durability keeps your gas cylinder safe and your property looking clean. Ships fully assembled to save on set-up time. Weight is 60% lighter than steel - meaning it costs less to ship and is easier to position. A pre-drilled hole at each corner accepts 5" (12.7mm) anchor bolts for maximum security and stability. Cylinders stay clear of ground.
