

18 FT Growing Dome – Small Greenhouse Kits

18 ft. Growing Dome® Classic Kit

Complete Growing Dome kit with two polycarbonate glazing options:

Twin-wall (8mm) 18 ft. Classic Kit – (\$32/sq. ft.) – \$7,950

Our 18 ft. small greenhouse kits include

- UV resistant, shatter-proof, insulating [polycarbonate glazing panels](#)
- A full set of pre-cut, color-coded struts, hubs and framing plus all hardware
- [Automatic opening vents](#)
- A solar powered [Climate control system](#)
- [Reflectix insulation](#)
- Select materials for the above ground pond
- [Shade cloth](#)
- Snow shed entryway with a [door with a window](#)
- [24" foundation wall](#) with structural siding

With 5-6 hours of sunlight per day, the twin-wall polycarbonate glazing keeps the Growing Dome 15-20 degrees F warmer than the outside temperatures while the multi-wall stays up to 30 degrees F warmer. We recommend the twin-wall polycarbonate for locations in plant hardiness zone 8b or higher. You can use the [USDA Plant Hardiness Zone Map](#) to look up what zone you are in using your zip code. (NOTE: 18 ft. greenhouse kits are produced with tip-taped triangles to serve our mission of being a low waste manufacturer. [Click here to learn more.](#))
