Re: T-Mobile CMRS at Aurora Branch YMCA
Case Number: 1984-6009-08

Mr. Barrett,

In response to your letter dated 11/8/2017, I have updated the site plan drawings accordingly.

As to the specific items listed in the letter:

1. Forestry – The compound and access easements were adjusted to miss all existing trees. Therefore, no trees will be removed for the construction of the proposed communications tower and compound.
2. Life Safety - The site plans were updated to reflect the Ethiopian Church expansion plans and the adjusted location of the compound.
3. Real Property – Per discussion with Mr. Akrie, the site plans shows the proposed fire lane and fire hydrant that will be built in the Ethiopian Church expansion plan. The updated site plan reflects the adjusted location of the compound, which corresponds with the Ethiopian Church site plan.

Please review the attached site plan and let me know if you have any questions or concerns.

Regards,
